Summary

Full Stack Developer with nearly **4 years of experience** building scalable, data-driven web applications using **JavaScript and TypeScript**. Experienced in React, Next.js, Node.js, and NestJS, with strong ownership across frontend and backend systems. Currently responsible for enhancing a large-scale device monitoring **platform handling 100K+ devices**, including real-time analytics, usage insights, and role-based access control. Proven at modernising legacy systems, resolving production issues, and delivering reliable solutions in fast-paced environments.

Profiles

Education

Uttaranchal University | Dehradun, Uttarakhand
B.tech CSE | 04/2022

- Graduated summa cum laude — GPA: 8.4

Skills

JavaScript, TypeScript, React, Next.js, Node.js, NestJS, MongoDB, TimescaleDB, MUI, REST APIs, Data Visualisation (Charts & Maps), Cron Jobs, Role-Based Access Control, Git, Production Debugging.

Experience

KSDAC LLP | Remote

Senior Full Stack Developer | 04/2023 - Present

- Designed, developed, and maintained a **large-scale device monitoring web application** for an ISP-focused client, managing **100K+ devices** including SIM-based, VSAT (fixed), and movable devices.
- Built and owned **end-to-end frontend and backend features** using **React, Next.js, Node.js, NestJS, and TypeScript**.
- Implemented **real-time and historical analytics dashboards** displaying device status (online/offline), data usage, bandwidth consumption, daily statistics, and custom time-based reports.
- Developed **role-based access control (RBAC)** to support multi-level access for clients, customers, and sub-customers.
- Integrated **charts, maps, and data visualizations** to represent device health, usage patterns, and geographical distribution.
- Created **scheduled cron jobs** to generate automated reports for configurable time periods.
- Modernized legacy codebases by upgrading outdated technologies, improving performance, stability, and maintainability.
- Worked directly with **production databases** (MongoDB, TimescaleDB), ensuring data accuracy and efficient querying.
- Collaborated closely with designers to translate **Figma designs into responsive ERP-style user interfaces** using Material UI (MUI).
- Investigated and resolved production issues, providing timely fixes to client-reported problems in a fast-paced startup environment.

Prospectss | Remote

JavaScript Developer | 09/2022 - 12/2022

- Developed and maintained **Chrome extensions** for a paid SaaS platform focused on data extraction from multiple social media platforms.
- Implemented **web scraping workflows** to automate data collection while handling platform-specific constraints and dynamic content.
- Built and enhanced **credit-based usage systems**, where each operation consumed credits and was billed accordingly.
- Contributed to multiple internal and client-facing applications, ensuring reliability and scalability of scraping processes.
- Worked with **JavaScript, browser APIs, and third-party libraries** to deliver production-ready extensions and web applications.
- Collaborated with the team to improve performance, error handling, and user experience of paid features.

Crossscope | Remote

Front End Intern | 01/2022 - 04/2022

- Worked as a **Frontend Developer Intern** at a healthcare technology company focused on AI-driven cancer treatment solutions.
- Developed and maintained core UI modules including **dashboard, authentication (login), and account management** sections.
- Integrated frontend components with backend services using **REST APIs** for real-time data handling.
- Built responsive and reusable UI components using **React.js, JavaScript, Material UI, Bootstrap, Formik, and Axios**.
- Ensured smooth user experience through proper state handling, form validation, and API error management.
- Gained hands-on experience delivering **real-world production features** in a regulated healthcare environment.
